## Four Members of the California Community Colleges Board of Governors Confirmed by California Senate

**Sacramento, Calif.** – Today, four members of the California Community Colleges Board of Governors were confirmed by the California State Senate on a 33-0 vote of approval. The 17-member board, primarily appointed by the governor, sets policy and provides guidance for the 72 college districts and 110 campuses that make up the California Community Colleges system.

State and federal leaders recognize the key role community colleges play in training the workforce and spurring economic recovery and growth. The members of the Board of Governors perform the vital role of keeping the core mission of the community colleges at the forefront of discussion, especially with the budget challenges facing the colleges.

"I am very pleased to learn the state Senate approved these outstanding members of the California Community Colleges Board of Governors," said Chancellor Jack Scott. "I've worked closely with these individuals and know first-hand they will provide strong statewide leadership as our colleges deliberate significant cutbacks to student services and course offerings.

"It is during these challenging economic times that broad policy direction emanating from the Board is helpful in order to ensure our 110 colleges maintain student access to career technical education programs and basic skills courses for persons in need of workforce training or a higher education degree. Recent news that California's unemployment rates are expected to rise to 12.3 percent by the year 2011, underscores why California must maintain the fiscal reliability of our state's community colleges so we can continue to succeed at putting people back to work which in turn will help stimulate economic recovery."
